Ice Cube's Chance in Hell (Maureen and Richard Hall) B

```
 B                  A          E           B      A                                  B
Floating on an ocean of desire and need, lost in fog and blinded by the haze.
   B       A               E         B          A                                  F#
Maybe we're an impossible dream, but let me sleep for just another day.
A                      E          B
I've never felt a hunger so great.
```

-chorus-

```
           B              E                          F#
In your eyes, I see moonlight dancing like fireflies,
     B                              E            F#
I hear the distant river, the ocean in a shell.
                    B             E                F#
I know you're talking, a heartbeat drowns out the sound.
       B                           E                    F#                        B    E   F#
It's probably just as well, something about a ice cube's chance in hell
```

Riding a whirlwind of passion and pain, drawn by your heart into the flame
I can't stop these feelings, like I can't stop the rain. I feel so close by you're so far away.
I live to hear those words you'll never say.

(chorus)

-bridge-

```
A                              B
I never felt so helpless, I never fell so hard.
A                           B
Fantasy, wishing on a star.
A                              B
I know you'll walk with me, in another life.
      C#m                                E                  F#
But just for now, won't you let me, dream with you tonight.
```

(chorus)
